Detect & Respond to Cyber Attacks with PROCYDE

07.06.2024

<https://join.procyde.com>

Cyber Defense: More Than Just Prevention

CYBER DEFENSE

1

Prevent as many cyber attacks as possible to protect your assets,

... but rapidly evolving cyber threats make prevention of all attacks impossible. Thus, **detection** and

2

... **response** capabilities are essential to fully protect your business!

3

Protection is goal,
detection & response
is reality

PROCYDE - Your trusted partner purely focused on Cyber Defense

Our Cyber Defense Portfolio

Consulting

Detection: SOC/CDC Consulting

- Building and improving **detection** capabilities
- Experienced project managers and SOC veterans

Response: CERT/CSIRT Consulting

- Building and improving **response** capabilities
- Experienced project managers and Incident Responders

Cyber Defense: Assessment

- Assessment of existing detection & response capabilities
- Definition of tailored measures
- Improvement of the maturity level

Services

Detection: Compromise Assessment as a Service

Every attacker leaves traces, Compromise Assessment makes it possible to recognize them reliably

Our service for checking whether you have been compromised

Response: Incident Response as a Service

Level up your response capabilities so that you can keep up with even the most sophisticated attackers.

Our service to guide you through every incident

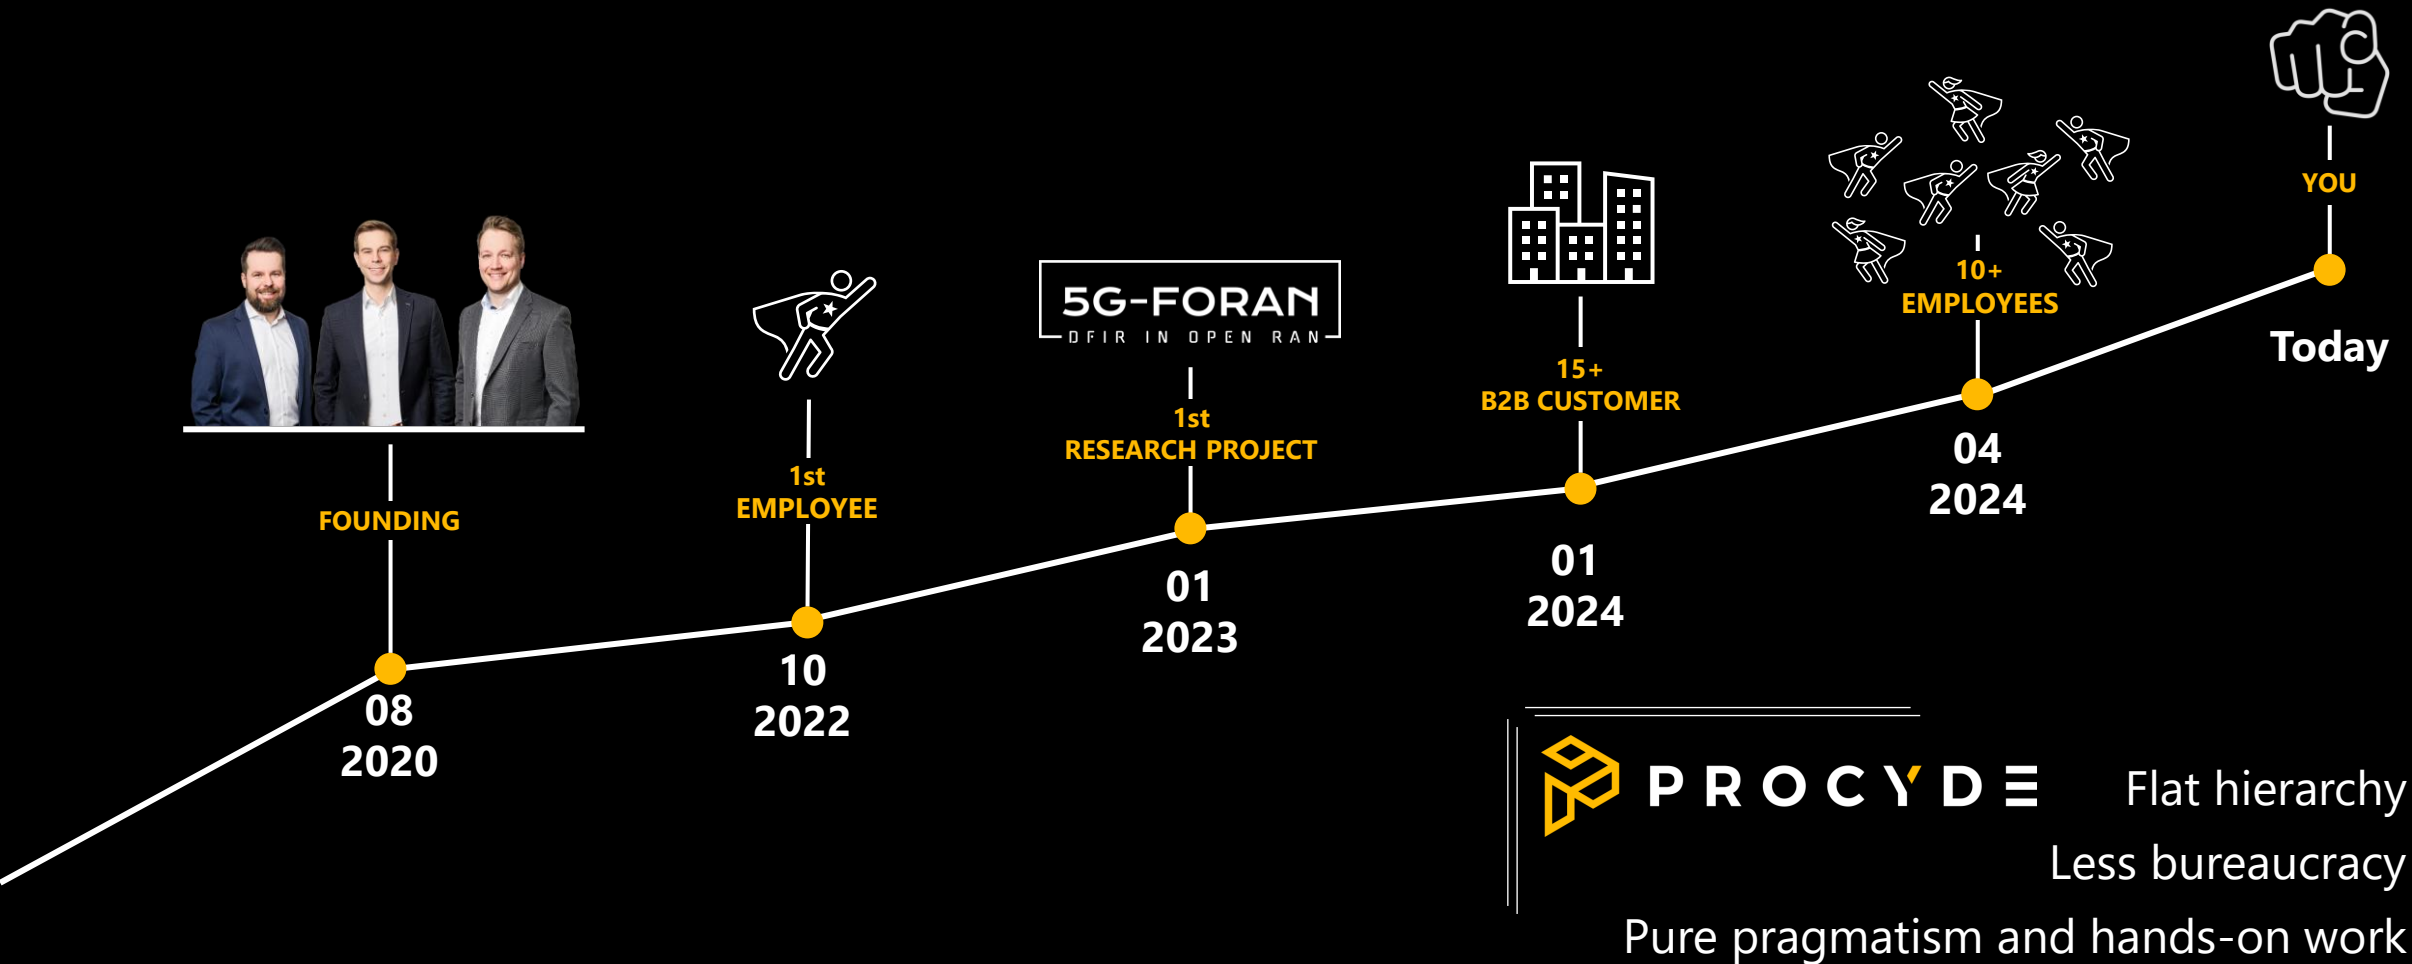

Cyber Defense: Phishing Awareness as a Service

Raise your employees' awareness through a simulated phishing attack and training based on it

Our service to train your staff

Grow With PROCYDE

What We Are Looking For

⚡ GRADUATES

⚡ B. / M. THESIS

⚡ RESEARCH PROJECTS & WORKING STUDENTS

Compromise Assessment (CA)

... the (evil) "Where's Wally" of Cyber Security

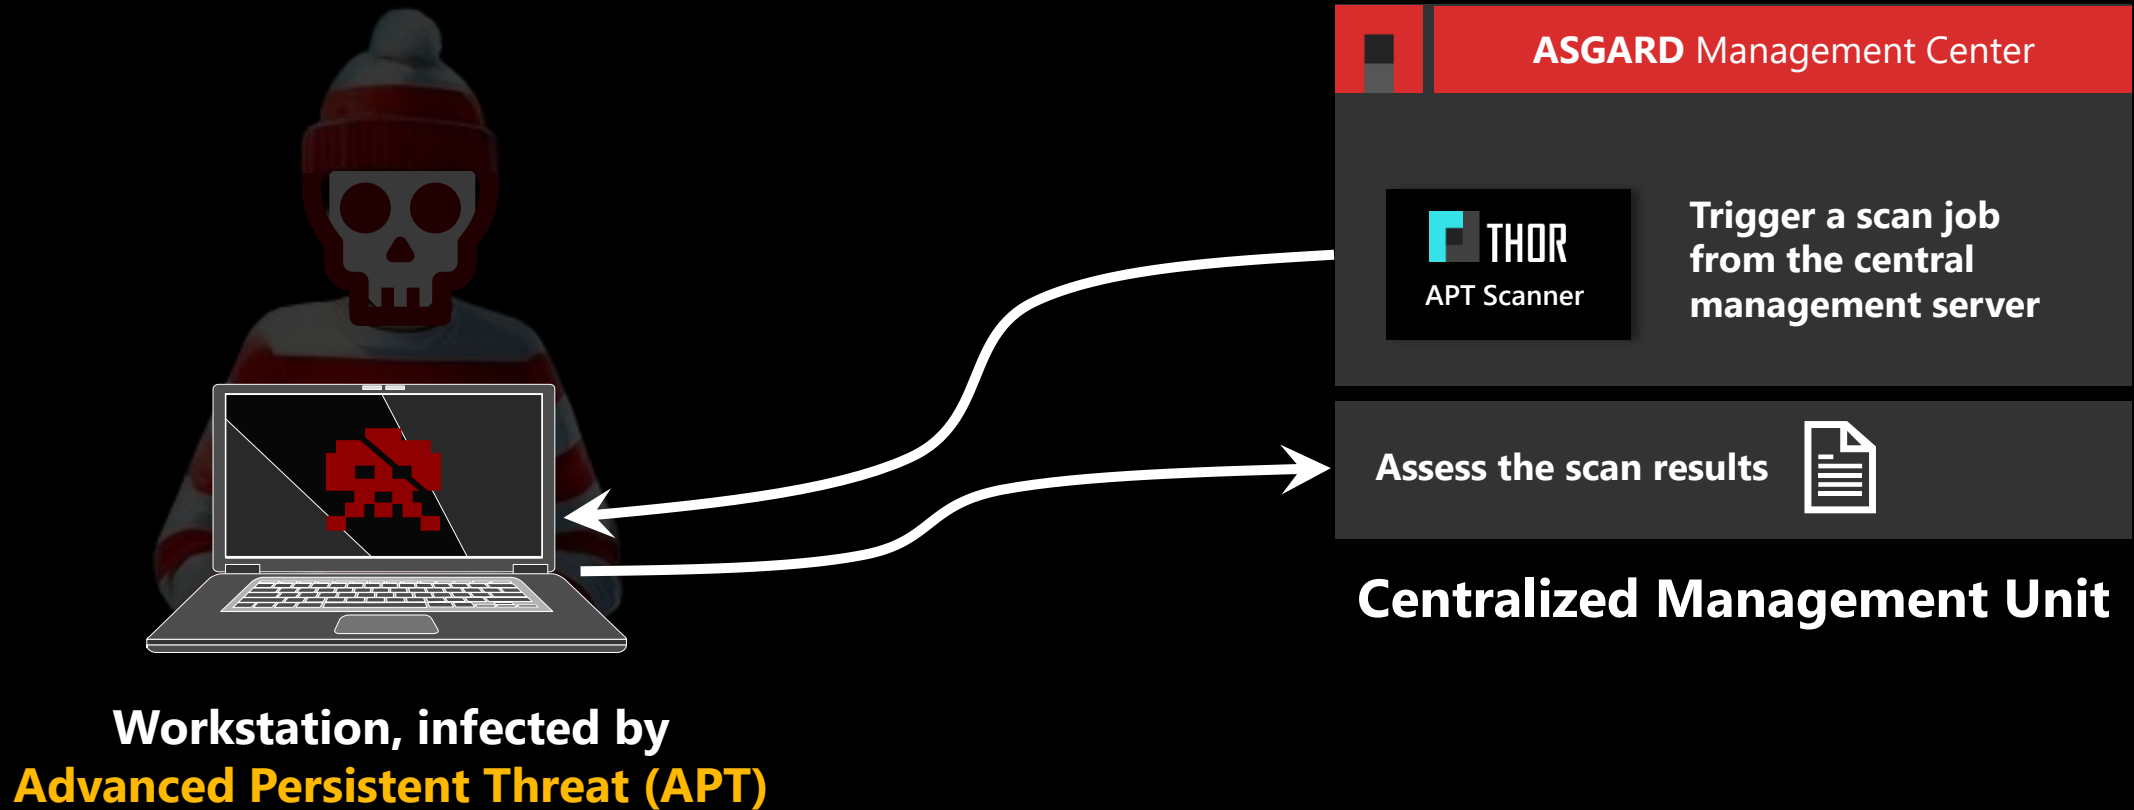

Compromise Assessment

” Other solutions show vulnerabilities, CA shows their exploitation.

- Option to scan hundreds of thousands of endpoints for (historical) traces of attackers
- Focus on attack tactics, techniques and procedures (TTPs) to identify advanced persistent threats (APT)
- Trigger ad-hoc response measures like endpoint isolation, evidence collection, etc.

Compromise Assessment (CA) – Demo
